WHY BLUEPRINT

# Filing that Speaks Lawyer.

Built by a securities lawyer for the people who live in SEC filings — attorneys, paralegals, CFOs and reporting teams. Plain workflows, no XBRL jargon required.

## No Back-and-Forth. No Markups. *No Waiting on Anyone.*

### No back-and-forth

Make changes the moment you need them. No emailing drafts and waiting on a revised version.

### No markups

Edit the filing directly instead of marking up PDFs for someone else to fix.

### No waiting

Tag, validate and proof yourself, right up to the deadline.

Built into every draft

### A filing assistant that does the work

BluePrint's AI filing assistant works in the draft with you. Write alongside it, hand it a redline to fold in, and let it take the routine edits off your plate.

Free with every workspace

### See it on your last 10-K

Create a free workspace and BluePrint emails the workspace owner a tagging sample of your most recent 10-K — a filing you already know.
